

With Lightweights™ - Anything is Possible

If you're just a kid off to school or a serious Triathlete, you can apply Lightweights™ to Anything you already own without having to spend big bucks on new stuff just to get the reflectivity required so we can go outside and PLAY!

Runners, Campers, Hikers, Cyclists, Skiers, Sailors, Kayakers, Pets, Trick-or-Treaters on Halloween... All benefit from wearing Lightweights™. Be bright, Be seen with Lightweights™.

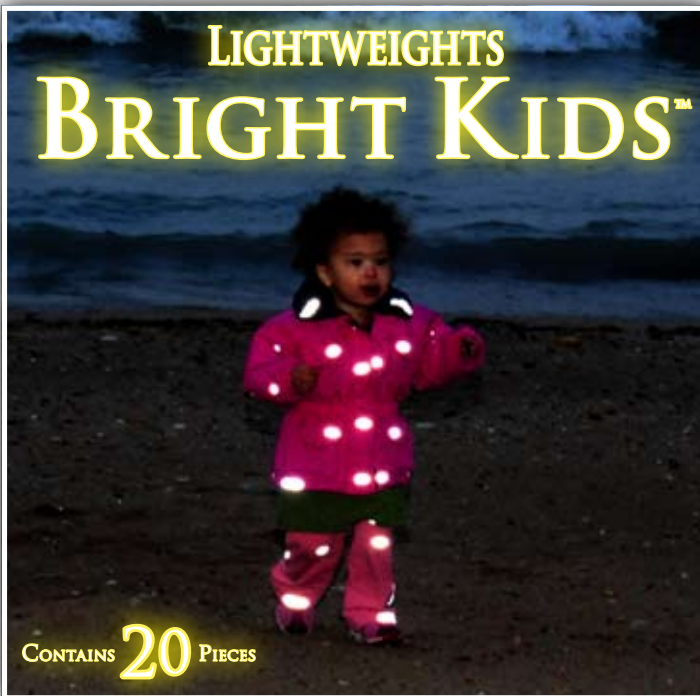

Lightweights™ are very bright and powerful, extremely flexible, little reflectors that stick to most anything and even stretch with stretchy fabrics or stay right in place on solid objects! Stick-On or Iron-On for Permanence!

Bright Kids Super Bright Reflective Ovals

Contains small parts and may pose a choking hazard only before being properly applied.

EVERYONE WANTS BRIGHT KIDS!

BOOTS • GLOVES • BALLS • TOYS
• MOTORCYCLES • WHEEL CHAIRS
COLLARS • LEASHES • CAR DOORS
TRIATHLETE • CAMPING EQUIPMENT
HALLOWEEN COSTUMES...

Installation Instructions

Before you begin:

Start with clean hands and work area free from dust and grease. Make sure the articles to receive Lightweights are also clean and dry. Perhaps test one on a new fabric and run it through the washer. Do Not heat in a dryer, as heat will reactivate the adhesive and perhaps loosen its grip.

Although Lightweights stick directly to most surfaces without heating, heat activates the adhesives ability to stick to clothing, so for an installation that has the highest likelihood of standing up to machine washing, we recommended ironing too.

Step 1:

Your work area, hands and all articles receiving new Lightweights should be clean and dry before proceeding to Step 2.

Step 2:

Plan ahead by imagining the Lightweights in a pattern that will be both pleasing and effective. You may even mark the positions lightly with a soft pencil.

Step 3:

Remove a Lightweight from the sheet being careful NOT to remove the white backing paper. Only remove the clear plastic layer to expose the green adhesive side.

Step 4:

Hold the Lightweight by the edges or with tweezers and visually align it to your pattern for a good final placement.

Step 5:

Even with tweezers try to only hold your Lightweight by the edge of the paper with the exposed adhesive facing downward and apply it.

Step 6:

Press the Lightweight into place with a finger or thumb from the center outwards to remove all air bubbles and insure good adhesion.

Step 7:

Rub paper with a fingernail to transfer Lightweight to fabric. Remove white paper backing. Finish for all pieces in this way.

Step 8:

Position fabric at the tip of an ironing-board and use the ironing paper provided to protect the iron from the adhesive.

Step 9:

At a setting recommended for the particular garment fabric, without steam, apply an iron to each Lightweight until set in place.

Step 10:

Bring each one to the tip of an ironing-board. Set it with heat until Lightweight takes on the texture of the fabric. Then you are all done.

Step 2: (Umbrellas)

Place Lightweights on outside of umbrella mid-point between the fold and the spoke along the edge.

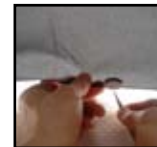

Step 3:

Place circular Lightweight at the end of the hub and the handle. The outside is now done.

Step 4:

Now let's do the inside. Open the umbrella and utilizing a light source, find the already applied Lightweight's silhouette.

Step 5:

Align your inside Lightweight over the shadow of the outside one.

Step 6:

Press the Lightweight in place and then the two together between your finger and thumb. Be bright be seen and have fun even in the rain.

Thank You for your Galfromdownunder Purchase

As a special thank you for your purchase in cooperation with Lightweight Safety Limited and especially if you like and want more of these special Power Reflectors simply visit www.lightweightsafety.com and receive **15% off** your choice of these reflectors you've come to love and any of the other fine reflective safety products from Lightweights™ that your heart desires.
